

• Calibration Services

Material Testing Machines Services is providing calibration services for testing machines like hardness tester & Universal testing machine, Tensile testing machine. Our laboratory is well equipped with instruments having National/International traceability.

We are providing calibration services meeting the requirements of ISO/IEC 17025:1999, NABL specific criteria & customers' requirements. Our NABL registration number is C-0262. Final assessment of NABL has satisfactorily completed on 5 th & 6 th April 2004

- | | |
|---|--|
| 1. Universal Testing Machine | - 100 kN to 1000 kN Capacity
- 2.5 kN to 50 kN Capacity |
| 2. Tensile Testing Machine | - Load Verification |
| 3. Rockwell Hardness Tester | - Indirect Verification
- Load Verification |
| 4. Rockwell Superficial Hardness Tester | - Indirect Verification
- Load Verification |
| 5. Brinell Hardness Tester | - Indirect Verification
- Load Verification |
| 6. Vickers Hardness Tester | - Indirect Verification |

These calibration services can be undertaken in presence of National / International inspection agencies like IRS, LRIS, TUV, BVQI, ABS, CHEMPRO & govt. Inspection agencies like IBR, EIL, NPCIL etc on request.

We undertake annual maintenance contract (A.M.C.) for these machines. We ensure no down time of any of the testing equipment under A.M.C. For that we maintain all necessary spares in our stock.
